

Use-Case Flow Specification

Use Case ID: UC-04

Use Case Name: Apply for Placement/Internship Drive

Primary Actor: Student Applicant

Supporting Actor: Placement Officer

Preconditions

1. The Student Applicant is registered and logged into the system.
2. An active placement or internship drive is available.
3. The student's academic details are available in the system.
4. The student has uploaded a valid PDF resume.
5. Eligibility criteria for the selected drive have been configured.

Main Success Scenario

1. Student Applicant logs into the Campus Placement & Internship Pipeline.
2. System displays the available active placement and internship drives.
3. Student selects a desired company drive.
4. System displays the company's eligibility criteria, including minimum CGPA, allowed branch, and backlog requirements.
5. Student selects **Apply**.
6. System checks the student's CGPA, branch, backlog status, and resume against the drive requirements.
7. System determines that the student satisfies all eligibility criteria.
8. System records the student's application.
9. System displays an application confirmation and application status.
10. Student is added to the eligible applicant pool for the next recruitment stage.

Alternate Flow — Student Is Ineligible

At Step 7:

- 7a. System determines that the student does not satisfy one or more eligibility criteria.
 - 7a1. System rejects the application.
 - 7a2. System displays the specific reason for rejection, such as insufficient CGPA, incorrect branch, or active backlog.
 - 7a3. System does not add the student to the eligible applicant list.
 - 7a4. Use case ends.

Postconditions

Successful: The student's application is recorded and the student is added to the eligible applicant pool for further recruitment stages.

Unsuccessful: The application is rejected and the student is informed of the specific eligibility discrepancy.
